

anterraDataCenter™

Synchronize Sage 300 Pervasive Data from multiple servers and data folders to Microsoft SQL Server

It's **YOUR** data unlock it's potential.

- ⊙ A SQL replication solution that works.
- ⊙ No need for a new server or SSD drives.
- ⊙ Works on an unlimited amount of data.

Your data folders are **combined** in a SQL data warehouse.

Each record is **tagged** with the Sage folder it came from.

Users access data through the tools you provide.

Reliable syncs let you start your day with a **coffee** instead of a **fire drill**.

Anterra Data Warehouse is updated incrementally on any frequency you want.

You can update data on table groups like **GL** or **AR** or on entire data folders.

anterraBI™
Take your data to the next level with our Cloud Business Intelligence Dashboards, Forecasting, WIP, and AR Collections.
